## Notes

These tables are associated with a paper presented on November 3, 2004 to Task Force 4 (child and maternal health) of The United Nations Millennium Project, entitled *Setting the stage for equity-sensitive monitoring of the health MDGs*. The authors are Meg Wirth, Deborah Balk, Adam Storeygard, Emma Sacks, Enrique Delamonica, and Alberto Minujin.

## About the Data

These tables are compiled from Demographic Health Surveys (DHS) of Cambodia (2000), Dominican Republic (2002), Ethiopia (2000), Ghana (1998), and Kenya (1998), and a Multiple Indicator Cluster Survey (MICS) of Tajikistan (2000).

All Values in the tables are percentages except ages (at first marriage and first intercourse), which are mean values. Values based on less than 25 cases are not shown. Values based on 25 to 50 cases are shown in parentheses.
